

SYSTEM DESIGN

1. System Access & Roles

1.1. User log in

- Login screen requires Username and Password.
- The system supports two application roles: Admin and Staff/Receptionist.
- Successful authentication routes the user to the appropriate dashboard and main menu.
- Log out returns the user to the login screen.

1.2. Admin role

Menu / Module	Functions	Key Details
Home	Dashboard	Navigates to dashboard.
Hotel Management	Room Types	Manage room type name, room size, standard capacity, maximum capacity, and base rate; edit rate and add room.
	Room Inventory	Interactive floor plan; manage Available, Occupied, Out of Order, and Under Maintenance states; show room number, type, and status.
Users Management	Staff Accounts	Create, edit, delete/deactivate staff accounts.
Reports	Financial Reports	Daily, monthly, and annual financial reports with printable PDF feature.
General Settings	Password / Discounts	Change password; configure statutory and seasonal discounts.
System Reset	Reset Data	Password verification, confirmation, and summary message before reset.
Log Out	Session Exit	Returns to login screen.

1.3. Admin Dashboard

- Available rooms [summary] – vacant room counter display
- Reservation [summary]
 - Arriving (expected guest arrivals for the day)
 - Departing (expected check outs for the day)
 - In house (currently checked in guests)
- Key performance [summary]
 - Daily revenue (real-time income totals)
 - Occupancy rate (percentage of total rooms occupied)

1.4. Staff/receptionist role

Menu / Module	Functions	Key Details
Home	Dashboard	Opens the dashboard and operational summaries.
Reservations	Reservation Records	Search/filter, add, edit, cancel, invoice, and export reservations.
	Add Reservation	Captures guest, stay, room, occupancy, discount, payment, and billing information.
Guest Management	Guest Records	Search by guest ID/name; edit profile; view stay history.
Log Out	Session Exit	Returns to login screen.

1.5. Staff/receptionist Dashboard

- Interactive visual floor map (view/inquiry mode)
 - Selecting a room opens a room-detail dialog.
 - Room details include room number/type, current status, daily rate, and room amenities.
 - A Proceed to Check-In button is shown only when the room is available.
 - Proceed to Check-In closes the room-detail dialog and opens the Add Reservation modal.
 - The selected room number, room type, and base daily rate are pre-filled in the reservation form.
- Available rooms [summary]
- Reservation [summary]
 - Arriving (expected guest arrivals for the day)
 - Departing (expected check outs for the day)
 - In house (currently checked in guests)

2. System Reset

System reset is an Admin-only function. The draft requires password verification, a confirmation step, and a summary message box.

Reset Type	Scope	Details
Factory Reset	Full reset	Includes transaction history, guest records, and room statuses returned to Available.
Selective Reset	Selected data logs	Admin chooses what to purge.
Selective Option	Guest history	Supports a date-range filter.
Selective Option	Financial & billing transactions	Purges selected financial/billing transaction records.
Selective Option	Room statuses only	Resets room statuses.

3. Hotel Management

3.1. Room Types

Room Type	Size	Standard Capacity	Maximum Capacity	Base Rate / Night	Key Amenities & Features
Standard Room	22 m²	2 Adults	3 Persons	₱2,500.00	1 Queen Bed; Free Wi-Fi; Work Desk; Air Conditioning; Private Bathroom; Smart TV
Deluxe Room	32 m²	2 Adults	4 Persons	₱3,800.00	1 King Bed or 2 Twin Beds; Mini Fridge; Private Balcony; Coffee Maker; Work Desk
Executive Suite	48 m²	2 Adults	4 Persons	₱5,500.00	Separate Living Area; 1 King Bed; Kitchenette; Mini Bar; Bathtub; City View
Family Suite	55 m²	4 Adults	6 Persons	₱7,000.00	2 Queen Beds; Dining Table; Living Room Space; Extra Storage; 2 Smart TVs

3.2. Room Inventory States

- Available – vacant room that can be assigned to a reservation/check-in.
- Occupied – room currently assigned to an in-house guest.
- Out of Order – room unavailable for normal reservation use.
- Under Maintenance – room unavailable while maintenance is being performed.

4. Reservation Management

4.1. Reservation Records

Area	Requirement
Search	Search by reservation code, guest name, or room number.
Status Filter	All, Pending, Check-In, Check-Out, No-Show, Canceled.
Reservation Code	Auto-formatted as YYYYMMDD-XXXX using booking date and daily counter.
Displayed Fields	Reservation code, guest name, status, room number, arrival date, departure date, total.
Add Button	Opens Add Reservation modal.
Edit Button	Modifies existing booking details.
Cancel Button	Marks reservation as canceled and makes the assigned room available.
Invoice Button	Generates/previews printable billing documents.
Export Button	Exports reservation records to CSV/Excel.

4.2. Add Reservation Form

Form Group	Fields / Controls
Guest Information	Surname, first name, middle name, contact, valid ID type, valid ID number.
Booking & Room Information	Check-in date, check-out date, auto-calculated number of nights, room type, assigned room number, adult count, child count.
Discount	Discount dropdown: None, Statutory, Lean Season, Peak Season.
Payment	Payment breakdown button; payment method; payment reference.
Billing	Room charge, extra-person fee where applicable, subtotal, discount, net amount, VAT where applicable, total amount.

5. Guest Management

Area	Field / Action	Requirement
Search	Guest ID / Name	Search guest records by guest ID or name.
Guest Record	Guest ID	Unique guest identifier.
Guest Record	Guest Name	Guest name.
Guest Record	Phone	Guest phone number.
Guest Record	Email	Guest email.
Guest Record	Total Visits	Number of recorded visits.
Actions	Edit	Updates profile details.
Actions	View Stay History	Pop-up showing reference number, room number, arrival date, departure date, and guest notes.

- Cash
- GCash
- Maya
- PayPal
- Card
- Bank Transfer
