 - navigates to dashboard
- Hotel management
 - Room types
 - Fields (name | room size | standard capacity | max capacity | base rate)
 - Edit rate & add room button
 - Room inventory (interactive floor plan)
 - Manages room availability states (available/occupied/out of order/under maintenance)
 - Shows room number, room type, & status
- Users management
 - create, edit, delete/deactivate staff accounts
- Reports (with printable PDF feature)
 - Daily, monthly, annual financial report
- General settings
 - Change password
 - Configure discounts
 - statutory discounts: pwd/senior citizen (20% & VAT exemption)
 - seasonal discount
 1. lean season (rainy months)
 2. peak season (holiday)
 - Reset system data – w/ password verification, confirmation, & summary message box
 - Factory reset – full reset, includes transaction history, guest records, room statuses back to default (available)
 - Selective reset – allows the admin to select specific data logs to purge.
Options include:
 1. Guest history (w/ date range filter option)
 2. Financial & billing transactions
 3. Reset room statuses only
- Log out – returns to log in screen

Dashboard

- Available rooms [summary] – vacant room counter display
- Reservation [summary]
 - Arriving (expected guest arrivals for the day)
 - Departing (expected check outs for the day)
 - In house (currently checked in guests)
- Key performance [summary]
 - Daily revenue (real-time income totals)
 - Occupancy rate (percentage of total rooms occupied)

STAFF/RECEPTIONIST ROLE

Main menu

- Home
 - navigates to dashboard
- reservation [records]
 - search & filter controls
 - search bar (by reservation code, name, or room number)
 - status filter dropdown (all, pending, check-in, check-out, no-show, canceled)
 - fields
 - reservation code/reference number (auto-formatted: YYYYMMDD-XXXX based on booking date & daily counter)
 - guest name
 - status (pending/check in/check out/no show/canceled)
 - room number
 - arrive date (check in)
 - departure date (check out)
 - total
 - buttons
 - add (opens ‘add reservation’ pop-up modal)
 - edit (modifies existing booking details)
 - Cancel (marks reservation as canceled; makes the assigned room available)
 - invoice (generates and previews printable billing receipts)
 1. record selection check (no row is selected, display a warning dialog: "Please select a guest reservation from the table to generate an invoice.")
 2. types dropdown (Pre-payment quote, advance payment receipt, final/folio/checkout receipt)
 - export to CSV/Excel
 - ‘add reservation’ pop-up modal/dialog form
 - guest info (surname, first name, middle name, contact, valid id type & number)
 - booking & room information
 1. check in/check out dates
 2. number of nights (auto, based on dates)
 3. room type & assigned room no.
 4. Guest count: number of adults & children
 - payment & discount info
 1. cost calculation formula: standard
 - room charge = base rate * nights (VAT-Exclusive)
 - if adult count > standard capacity:
 - extra person fee = extra adults * fee per night * nights
 - subtotal = room charge + extra person fee
 - discount = subtotal * discount rate
 - net amount = subtotal – discount
 - VAT = net amount * 0.12
 - Total = net amount + VAT

Note:

 - kids stay free
 - VAT exemption for statutory discounts (skip VAT computation)
 - no discount stacking (cannot have seasonal & statutory discounts at the same time)
 2. discount dropdown (none, statutory, lean season, peak season)
 3. Payment breakdown button
 4. Payment method (Cash, Gcash, Maya, Paypal, Card, Bank Transfer)
 5. Pay reference (Id reference for e-wallet/card IDs)
